

Seminar on “Changing Patterns of Global Educational Mobilities: What Does the Future Hold?”

Date: Thursday 18 October 2018

Time: 13:00 – 14:00

Venue: E33-G021, Tin Ka Ping Lecture Hall, Faculty of Education

Language: English

Target Audience: UM Staffs and Students

Online Registration: <https://goo.gl/euozan> or QR Code

A complementary light lunch will be provided

Abstract

This presentation examines both new and established forms of educational mobility of students, academics and higher education institutions and underlines the importance of considering external higher education mobilities (what happens abroad) in conjunction with internal forms (what happens at home). For large emergent economies such as China, Mexico, South Africa and India, internal higher education equality (and inequality) could influence the future development of external higher education mobilities and have a resultant impact on the long term economy (Marginson, 2017). As internal education mobilities in countries such as China could either exacerbate inequalities or equalise society, the nature of domestic education mobilities could influence capacity building and be hugely influential on innovation and entrepreneurship of the future.

Speaker

Prof. Catherine Montgomery is Professor of International Higher Education in the Department of Education at the University of Bath. Her research focuses on internationalisation of higher education with a particular interest in transnational higher education in China and East Asia. Her recent work focuses on international higher education mobilities, mainly with reference to flows of international students and considers what this can tell us about the changing landscapes of global higher education.

She has recently been appointed to the role of Academic Director of International Partnerships at the University of Bath. In this new role, she is engaging with the strategic development, coordination and delivery of worldwide partnerships and supporting faculties and departments in identifying, developing and maintaining research, teaching and knowledge-exchange links and partnerships with institutions overseas.
