ABOUT UM 澳大概況

Founded in 1981, the University of Macau (UM) is a comprehensive research-oriented public university of international standing. It is home to over 15,000 students from nearly 50 countries and regions, and 80% of its faculty members are from outside Macao. English is the primary medium of instruction. With a multicultural campus and a system of whole-person education underpinned by faculties and residential colleges in an international education setup, UM has made significant progress in enhancing its international reputation. In recent years, the university has been ranked among the world's top 200 universities.

UM's motto is 'Humanity, Integrity, Propriety, Wisdom, and Sincerity'. The university, originally the private University of East Asia, was acquired and restructured by the Portuguese Macao government in 1988 and renamed the University of Macau in 1991. UM's teaching units include the Faculty of Arts and Humanities, Faculty of Business Administration, Faculty of Education, Faculty of Health Sciences, Faculty of Law, Faculty of Science and Technology, Faculty of Social Sciences, Honours College, Graduate School, and Centre for Continuing Education. Its research institutes include the Institute of Advanced Studies in Humanities and Social Sciences, Institute of Applied Physics and Materials Engineering, Institute of Chinese Medical Sciences, Institute of Collaborative Innovation, Institute of Microelectronics, Asia-Pacific Academy of Economics and Management, and Centre for Macau Studies. UM offers over 120 degree programmes at bachelor's, master's, and doctoral levels. It has also signed cooperation agreements with over 330 higher education institutions spanning more than 40 countries and regions, actively fostering international partnerships.

UM adopts a research policy that can be summarised as 'highlighting characteristics, leveraging strengths, creating peaks, and strengthening cooperation'. With approval from the central government, the university has established three state key laboratories dedicated to advancing research in Chinese medicine mechanisms and quality, analog and mixed-signal VLSI, and the Internet of Things for smart cities. UM is among the top 1% in the Essential Science Indicators (ESI) database in 15 fields: Engineering, Materials Science, Computer Science, Chemistry, Clinical Medicine, Pharmacology & Toxicology, Psychiatry/Psychology, Social Sciences, General, Biology & Biochemistry, Molecular Biology & Genetics, Agricultural Sciences, Economics & Business, Environment/Ecology, Geosciences, and Mathematics. Among these, Engineering, Computer Science, and Pharmacology & Toxicology are ranked in the top 0.1%.

With the support of the central government and the Macao SAR government, UM relocated to its current campus on Hengqin Island in Guangdong Province in 2014, which is under the jurisdiction of the Macao SAR. Spanning approximately one square kilometre, the campus provides an ideal environment for UM to realise its educational vision, including the implementation of whole-person education through a residential college system. Building on new opportunities in the Guangdong-Macao In-Depth Cooperation Zone in Hengqin, UM held a groundbreaking ceremony for its campus in the Cooperation Zone on 9 December 2024. This sets the stage for UM to become the first higher education institution in Macao to extend its teaching and research activities in the Cooperation Zone.

Looking forward, UM, as a university firmly rooted in Macao, will continue to leverage Macao's unique advantages to contribute to the development of the Greater Bay Area, integrate with the nation, and go global. UM aspires to become an internationally recognised university of excellence through high-quality and student-centred education, high-impact research, and outstanding community services.
