“Inventions, innovations and Venture Capital”

[Dr. Yochanan Shachmurove](#)

Professor
Department of Economics and Business
The City College of the City University of New York

Abstract

This paper examines the financing of innovations by venture capital in the United States since 1995 using quarterly data. Both location and industry sector are considered as important factors in determining financing innovations. The paper studies the effects of macroeconomic variables on the amount of first round venture capital financing. By examining long term trends of the first round investment and its association with macroeconomic variables, the effects of the current financial crisis on first stage venture capital investment may be better analysed.

Date: July 24, 2012 (Tuesday)

Time: 15:00 – 16:30

Venue: JM23

ALL ARE WELCOME!
