## “俱樂部藥物濫用與預防方案”

臺灣中正大學副校長、犯罪學教授

楊士隆教授主講

### 內容

近年台灣年輕族群吸食毒品問題日趨嚴重，其中又以甲基苯丙胺 (Methamphetamine)、中樞神經抑制劑如 (GHB) 及凱他命 (Ketamine) 等為年輕族群所使用非法藥物的主流。研究與司法實務顯示娛樂場所如俱樂部 (夜店) 等與非法藥物使用擁有一定程度的相關性，本主題將探討並透過國內外研究文獻蒐集，並針對於 2014 年 5 至 7 月期間對台灣台中市及高雄市俱樂部 (夜店) 業者 10 名進行的焦點座談，探討實際非法使用藥物之現況與情境，並嘗試參考國際間在預防方案上效能較佳之瑞典、英國及新加坡等國之作法，聚焦於強化夜店員工訓練等情境犯罪預防策略之探討，以降低年輕族群於夜店藥物濫用引發之性侵、酒駕與吸食/販賣毒品等嚴重社會問題。

**Abstract**

In the recent years, drug abuse among adolescents who use Methamphetamine, GHB and Ketamine is getting serious in Taiwan. Previous study and judicial practice have found generally that illicit drugs transaction was frequently occurred in the specific places such as night clubs. The topic will conclude the study of collecting domestic/international literature and conducting focus groups involving 10 managers/operators of nightclubs in Taichung and Kaohsiung City during May to July, 2014. The prevalence and risk factors among drug abusers were explored by above methods. The anti-drug measures in night clubs for the Sweden, the United Kingdom and Singapore, which focusing on situational crime prevention strategies were introduced and consulted the focus groups so as to prevent club drug abuse and related crime such as drunk drivers, sexual assault and drug abuse/drug dealings.
