

THE PAST, PRESENT AND FUTURE OF HONG KONG INTERNET EXCHANGE (HKIX)

Mr. Che-Hoo CHENG

*Associate Director
Information Technology
Services Centre, The Chinese
University of Hong Kong*

Date | 10/5/2016
Time | 10:30am - 11:30am
Venue | E11-G015

All Are Welcome

ABSTRACT

HKIX has been established for more than 21 years. It played an important role for the development of Internet in Hong Kong and in Asia Pacific. It will continue to play such role but finding a long-term self-sustainable model is critical to the continuity of HKIX. The speaker will address the pass, present and future of HKIX at his talk. Hopefully, he can give some hints to the audience on the continuous development of Internet in Macau.

BIOGRAPHY

Mr. Che-Hoo Cheng is in charge of the central IT infrastructure and operations of The Chinese University of Hong Kong (CUHK) covering campus network, central data centres, servers, storage, backup and 24×7 operations. He has over 30 years of experience in the area of IT and Internet infrastructure. Besides working for CUHK, he also worked in the commercial sector for 7+ years. He is also the key person behind the operations of Hong Kong Internet eXchange (HKIX) under CUHK which helps improve the interconnections among ISPs in Hong Kong and around the Asia Pacific Region.
